Color Change Tip
When it's time to chain at the end of the row, pull the new color through for the ch 1 then start your next row. Be sure to go back and tie the ends together and weave in.

Notes
If you would like to adjust the width of this scarf you can easily by increasing or decreasing your starting chain number. Just be sure to alternate your stitches to create the texture. If you end your row with a sc, the first stitch of your next row is a hdc and vice versa. You can also adjust the length to whatever works for you by adding or decreasing rows.
